We have found the foregoing accounts of the Selectmen and Overseers of the Poor to be properly vouched and correctly cast.

JOHN S. WOODWAN, }
ISRAEL O. DEWEY, } AUDITORS.

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE, OF HANOVER, FOR THE YEAR ENDING MARCH 10, 1863.

The whole number of scholars reported as having attended school in the several Districts during the year 434.

DISTRICT No. 1.

The first division of this school of 13 weeks, numbering 40 scholars in the Summer term, was taught by Miss C. A. Pennock. Dr. T. R. Crosby, who was on the Committee at the commencement of the year, and who visited this school, says of Miss P. "She is an experienced teacher; possesses many of the elements of a good teacher—energy, faithfulness, and a strong desire for the improvement of her scholars; but thinks she failed in acquiring their love and confidence."

The second division of this school, Summer term, 11 weeks, 47 scholars, and the Fall term, the two divisions united, of 9 weeks, 72 scholars; also, the second division of the Winter term, 11 weeks, 58 scholars, were under the care and instruction of Miss Celia L. Moulton. Mild and gentle she won the affection of her pupils, and is evidently well adapted to the position she occupied.

The Winter term of this school, first division, 12 weeks, 60 scholars, was taught by Mr. James M. Whitaker. Mr. W. is an experienced, well qualified teacher, and a strict disciplinarian; which characteristics are very necessary in such a school.

Of his school he himself says, "it has been a pleasant one in many respects. The scholars have exhibited a good and kind disposition toward each other and their teacher. The scholars have generally acceded to the wishes of their teacher with a cheerfulness highly creditable to themselves.

The school evidently has suffered much from irregularity in attendance and tardiness. The attention to correct reading in the first class was particularly commendable.

The Registers of the school for the year report 143 different scholars, more than a third of the scholars in all the schools.

DISTRICT No. 2.

The Summer term of 8 weeks, and the Winter term of 12 weeks, 9 scholars each term, were taught by Miss Maria M. Woodward.

Her manner in teaching and managing a school is marked by quietness and diligence, but not wanting in energy and strict discipline. Whole number of scholars 11.

DISTRICT No. 3.

The summer term of 10 weeks, 12 scholars, was taught by Miss Lucy R. Hurlbutt. Her school was very much interrupted by sickness among the scholars, and hence at the close, few being present, did not appear to advantage. But Miss Hurlbutt has evidently made a good beginning as a teacher.

The Winter term of 10 weeks, 17 scholars, has been taught by Mr. A. B. Chase. A good beginning was made, but the school was interrupted by the ill health of the teacher, who finally left it to the care of another, Mr. Frank J. Praddex. It has not been visited since. Whole number of scholars 19.

DISTRICT No. 4.

The Summer term of 19 weeks, 20 scholars, was taught by Miss Elizabeth Smith. The school appeared well; recitations prompt; the reading of the first class was very commendable.

Fall term of 9 weeks, 21 scholars, was taught by Miss Lucy G. Roberts. Progress in the different branches respectable. A stricter discipline would doubtless have improved this school.

Winter term of 12 weeks, 26 scholars, taught by Miss Ellen F. Smalley. The appearance of the school was highly gratifying. Government mild and efficient. 21 out of the 26 scholars reported not having whispered without leave during the term, and the others in only from one to three instances. This school in respect to higher branches stands first in the town. One in Chemistry, 2 in Algebra, 5 in Natural Philosophy and Astronomy and 1 in Geometry.

Whole number of scholars 32.

DISTRICT No. 5.

Summer term of 12 weeks, 38 scholars, taught by Miss Mary E. Muchmore. School appeared well; some excelled in reading; recitations prompt; discipline good. Miss M. classes among our best teachers. In Algebra 3, 8 reported in higher branches.

Winter term of 12 weeks, 23 scholars, taught by Mr. B. Frank Wright. The school appeared well, both in respect to recitations and discipline. Number present small when visited the second time. In Algebra 2, in Philosophy 4.

Winter term, division of small scholars, 12 weeks, 14 scholars, taught by Miss Cordelia I. Richardson. A pleasant and faithful teacher; her manner well adapted to her school of small scholars.

Whole No. of scholars 53. Much of the benefit lost by irregular attendance.

DISTRICT No. 6.

Summer term of 10 weeks, 11 scholars, taught by Miss Emily Leavitt. But few of the scholars present when visited the second time.

Winter term of 10 weeks, 11 scholars, taught by Mr. D. B. Russell. His manner mild and pleasant, but evidently lacking in vigilance in the matter of discipline. There was evidently a want of interest in the school on the part of the scholars generally; hence the average attendance was small and the benefit of the school in a measure lost. Whole number of scholars 16.

DISTRICT No. 7.

Summer term of 10 weeks, 11 scholars, taught by Miss Harriet E. Gilbert. School quiet and orderly.

A Fall term of 10 weeks, 16 scholars, and the Winter term of 12 weeks, 19 scholars, were taught by Miss Bettie J. Porter. Miss P. is an experienced and successful teacher. Progress of the school good. Six in advanced studies; a class of 2 in Geometry and others in Philosophy. Whole No. of scholars 22.

DISTRICT No. 8.

Summer term of 8 weeks, 8 scholars, taught by Miss Anna S. Osgood. Her first school. With the needful experience she will, it is hoped, excel as a teacher.

The Winter term of 11 weeks, 11 scholars, taught by Miss Emma A. Brigham—a skillful and faithful teacher. This school, interrupted by the sickness of many of the scholars, was discontinued about two weeks before it would have closed. Though small, in scholarship and advanced studies it ranks among our first schools. A class of 3 in Algebra. Whole No. of scholars 11.

DISTRICT No. 9.

The Summer and Fall terms of this school were taught by Miss Naomi R. Swetland, each term 12 weeks, 7 scholars. Miss S. is a faithful teacher. Progress good. No. of scholars 8.

DISTRICT No. 10.

Summer term of 10 weeks, 8 scholars, taught by Miss E. A. Brigham. School very much interrupted by sickness of the scholars. Attendance small throughout.

Winter term of 11 weeks, 11 scholars, taught with marked success by Miss Sarah C. Bliss. Some of our best scholars are in this school. 2 in Algebra. Only 8 instances of whispering during the term.

Whole No. of scholars 11.

DISTRICT No. 11.

Summer term of 8 weeks, 11 scholars, taught by Miss Emma E. Webster—an experienced and faithful teacher.

Winter term of 8 weeks, 11 scholars, taught by Miss Georgianna Harris. School quiet and well managed. No. of scholars 13.

DISTRICT No. 12.

Summer term of 8 weeks, 18 scholars, taught by Miss Samantha R. Kinne. This term was much interrupted by sickness of the scholars. Under the circumstances its appearance was creditable to the teacher.

Winter term of 15 weeks, 25 scholars, under care of Miss Emily C. Jones, made good progress, and appeared well in every respect. Whole No. of scholars 26.

DISTRICT No. 13.

Summer term of 11 weeks, 11 scholars, Miss Martha A. Warren, teacher. A well qualified and acceptable teacher. Only 6 were present at the close.

Winter term of 12 weeks, 20 scholars, Miss Emily Leavitt, teacher. She is among our best qualified, faithful and successful teachers. Good attention was paid to reading. This school ranks well in comparison with the other schools in town. 5 in Algebra.

Whole No. scholars 22.

DISTRICT No. 14.

Only one term of 10 weeks in this District, taught by Miss Laura A. Dewey. Miss D. sustained her former good reputation.

No. of scholars 6.

DISTRICT No. 15.

The Summer term of 10 weeks, 8 scholars and Fall term of 15 weeks, 10 scholars, were taught by Miss Lorinda E. Withington. In the appearance and progress of this school Miss W's. usual y quiet and faithful manner was manifest. Whole No. of scholars 10.

DISTRICT No. 16.

Summer term of 10 weeks, 8 scholars, taught by Miss Miriam Coates. The school at the close appeared to have been under the care of a competent, faithful and devoted teacher.

Winter term of 11 weeks, 7 scholars, under the care of Miss Lorinda C. Withington. The school appeared well when visited. It was tod visited near the close. Whole No. of scholars 11.

DISTRICT No. 17.

The Summer term of 16 weeks, 8 scholars, taught by Miss Mary P. Rawson. Of this term Dr. Crosby says, "Miss Rawson sustained her reputation as a teacher and manager." "The pupils of this school," he adds, "deserve a word of commendation. The number is small, but the interest in the business of the school is abundantly manifest. Such pupils always bear a good testimony in regard to home influences."

The Winter term, to continue 18 weeks, 9 scholars, is under the care of Miss Lucy Cutter. Under her faithful and discreet management the school is sustaining its former good reputation. 2 in Algebra. Whole No. of scholars 11.

DISTRICT No. 18.

Summer term of 8 weeks, 6 scholars, Miss Alice V. Thayer. Her first term in teaching. She did well.

Winter term of 8 weeks, 11 scholars, Miss Samantha R. Kinne, teacher—an efficient and devoted teacher. She has given very good satisfaction. Whole number of scholars 12,

3 4677 00066042 8

16

With few exceptions our schools the past year have been under the care of skillful and successful teachers, and the progress in the different branches quite commendable. While the common branches have not been neglected, in some of the schools higher studies have been introduced, showing a higher standard of attainment and enlarging the sphere of mental discipline.

Our schools have been under the care and instruction of 33 different teachers, 5 males and 28 females. Whole number of weeks of schooling 444, 44 of which were by male teachers.

If we look at the effort required, the amount of funds expended, and the object to be attained, our common schools are no small item of public interest. They are among our richest privileges, and most important institutions. In them our children are passing a most important period of life; receiving impressions, which will give character to mature age. Here are received the first lessons of a literary education, where often a desire for more extensive learning is awakened. Here generally are acquired those rudiments of knowledge, which fit one for the various business of common life, and those sentiments imbibed, and habits cultivated, which have their influence in forming the future companion, neighbor and citizen.

Would we reap all the benefit which our excellent Common School System is adapted to promote, we must fully carry out its details. The Town, the Superintending Committee, the School District, and the Prudential Committee must each perform their part wisely and skillfully. We shall then have well qualified and efficient teachers, suitable books, and school rooms adapted to health and comfort. With provision, and such agency our children and youth will be trained to virtue and knowledge, and will be a blessing to the family, the town, the State and the nation.

But much of the benefit which might be derived from the Common School is liable to be lost. I will not here repeat what has been frequently said in former Reports, concerning some of our school-houses; but refer to those Reports. But I will mention two items which are a source of loss from year to year. I refer to irregularity in attendance, and too great a variety of text-books.

Parents may not be aware that a scholar attending but half of the time loses much more than half the benefit of the school, or that the frequent tardy mark is a great damper to progress. Such loss is very apparent in some of our schools.

With regard to books, I would recommend that when new books are purchased, the following be procured, Adams', Greenleaf's National, Colburn's, and Emerson's North American Arithmetics, Weld and Quackenbos' Grammar; Quackenbos' large and small History of the United States; Cutter's Physiology; Colton & Fitch's Geography; and Davies' Algebra.

BEZALEEL SMITH,

SUPERINTENDING SCHOOL COMMITTEE.
